

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-18 (cancelled)

19. (currently amended) An erythropoietin solution preparation containing erythropoietin in combination with

a first stabilizer, wherein said first stabilizer is one or more amino acids selected from the group consisting of leucine, glutamic acid, and their salts[[.]], and

a second stabilizer, wherein said second stabilizer contains one or more amino acids selected from the group consisting of histidine, tryptophan and serine, and their salts.
20. (previously presented) The solution preparation of claim 19, wherein the stabilizer is one or more amino acids selected from the group consisting of L-leucine, L-glutamic acid, and their salts.
21. (previously presented) The solution preparation according to claims 19 or 20, wherein the concentration of the amino acid is 0.1 to 40 mg/ml.
22. (previously presented) The solution preparation according to claims 19 or 20, which does not contain urea.

23. (currently amended) The solution preparation according to claims 19 or 20, which does not substantially contain a protein as a stabilizer[[:]].
24. (previously presented) The solution preparation of according to claims 19 or 20, which further contains a surfactant, a salt or combination thereof.
25. (currently amended) The solution preparation according to claim [[19]]24, wherein the surfactant is a polyoxyethylene sorbitan alkyl ester.
26. (previously presented) The solution preparation according to claim 25, wherein the surfactant is polysorbate 20, polysorbate 80, or combination thereof.
27. (previously presented) The solution preparation according to claim 24, wherein the salt is sodium chloride.
28. (previously presented) The solution preparation according to claims 19 or 20, which has been dissolved in a buffer.
29. (previously presented) The solution preparation of claim 28, wherein the buffer is a phosphate buffer, a citrate buffer, or a combination thereof.
30. (previously presented) The solution preparation of claim 29, which further contains a surfactant, a salt or a combination thereof.

31. (previously presented) The solution preparation of claim 30, wherein the surfactant is a polyoxyethylene sorbitan alkyl ester.
32. (previously presented) The solution preparation of claim 31, wherein the surfactant is polysorbate 20, polysorbate 80, or a combination thereof.
33. (previously presented) The solution preparation of claim 30, wherein the salt is sodium chloride.
34. (cancelled).
35. (currently amended) A method for stabilizing an erythropoietin solution preparation which comprises adding
- a first stabilizer which contains one or more amino acids selected from the group consisting of tryptophan, serine, arginine, and their salts, to the erythropoietin solution preparation, and
- a second stabilizer which contains one or more amino acids selected from the group consisting of histidine, tryptophan and serine, and their salts.

Claims 36-41(cancelled).
